Getting started

Visit messagingmedia.com and validate your business email. Validation ensures your emails can be converted into text messages. Alternatively call our 24/7 service team who will have you set up and texting in under five minutes.

Once your email has been validated, you simply open a new email and enter the mobile number followed by @e2s.messagingmedia.com (for example: 0417830495@e2s.messagingmedia.com), type your message in the body of the email, and click 'send'.

support**

Save time and increase revenue

“SMS makes sense ... The message is delivered straightaway, and we can include information such as dates, times and venues, which makes it easy for everyone.”

Jeremy Cassidy, Systems Manager, Estia Health Aged Care
